The NEW St Patrick’s Technical College **Mining & Resources** course has been developed to provide a pathway to direct employment in the Mining, Oil & Gas, Energy and Resources industry through a Civil Construction qualification.

Successful completion of the full two-year program can also provide an avenue to further education opportunities that lead to professional and/or para-professional careers in the sector.

This course has been endorsed by the Resources & Engineering Skills Alliance (RESA) as an approved Resources & Mining Pipeline (RAMP) employment program.
