PLUMBING

COURSE DESCRIPTION

The St Patrick’s Technical College Plumbing course has been structured to give students a strong foundation in principles that will enable them to move into a career in the trade. It provides students with a high level of skill as well as a sound understanding of the industry.

Throughout their course students cover the skills needed to be successful in a broad range of disciplines; from general plumbing and gas-fitting to roof plumbing and sprinkler fitting.

The pre-vocational training at St Patrick’s is undertaken in our outdoor classroom and at our award winning live build sites.

COURSE STRUCTURE
